PCT/JP2005/006226

Box No. VIII Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

The term [...between source and drain regions ...] used in Claim 1 and [...below a gate and between source and drain regions of said buried channel type and surface channel type MOS transistors ...] used in Claim 2 render the definition of the subject matter of said claim unclear for the following reason:

Consequently they render the position of a first conductive type impurity region unclear.
